

Vacuvita

Skills

Defining functional specification of vacuum system

- Design
- Pneumatics
- Electronics
- Software

Ensuring product functional & esthetical quality

Testing, Verification & Approbation

Leading manufacturing process

- Release FOT / SOT / Pilot Production
- Troubleshooting at Injection Process & Assembly
- Ensuring Quality Control & Inspection

Results

- Successful market launch of 6.000 products
- Stable production of >5.000 products/month
- Excellent rating by over 900 customers via Trustpilot

Key features

Easy access food storage

- Lid opens automatically
- Pump algorithm recognises and defines vacuum levels

Suitable for all environments

- Materials suitable for microwave, fridge, freezer & pantry
- Containers held up to -60 kPa

High end design

- Stainless steel look
- High gloss finish
- Subtle LED indicator light

Materials

- Plastic injected parts
- Silicone parts
- Electronic parts (3 PCBA)
- Pneumatic parts
- Metal parts
